

ACCOYA® WOOD

Key Features and Benefits

Accoya® is the world's leading high technology long-life wood and one of the most durable, stable and sustainable materials to use in the manufacture of **outdoor furniture**.

Accoya® is made from New Zealand grown **sustainably** forested radiata pine, which is shipped to The Netherlands where it undergoes a proprietary acetylation process.

The process involves a pressurised injection system that alters the physical properties of the wood by changing the cellular structure. Essentially, the wood is pickled in a 100% **vinegar-type solution**.

The process is **non-toxic** and adds nothing to the wood that does not already naturally occur within it. Thus, Accoya® wood is **100% recyclable**.

Accoya® wood has a **50-year guarantee** for outdoor use and is UV and rot resistant. Swelling, shrinkage and cracks may occur, which is natural behaviour of wood when used outdoors.

Accoya® wood has been awarded a range of accreditations and eco-certifications, as further support of its unique sustainability properties.
